Manning...

From Trooplist to ASR

00/00/16

- DC, CD converts the Trooplist into the Authorized Strength Report (ASR)
- ASR employs modeling algorithms that *optimize* unit manning allocation based on
 - 1) Unit Structure (grade & MOS at an MCC)**
 - 2) Trooplist manning**
 - 3) Special protections**

Manning Process...

The Bottom Line

00/00/16

- **Available manning is optimally apportioned across the Corps by DC, Combat Development**
- **Why is this important to monitors?**
- **It is not the role of M&RA to...**
 - **Prioritize requirements or**
 - **Allocate manning**
- **These functions have already occurred in the ASR under the cognizance of DC, CD**

The Staffing Process

00/00/16

- The objective of the Staffing Process is to make the *optimal* distribution of current assignable inventory to meet the Marine Corps' Authorized Strength Report (ASR) IAW current Marine Corps staffing precedences (MCO 5320.12E)
